

# A-337-BNC

## 433-500 MHz UHF Antenna

### Features

- Extra Flexible
- Ground Independent Antenna
- Survey – Mining Use
- Ultra Robust Construction

A-337-BNC is ultra robust construction designed for applications where conventional antenna failed in Mining/Survey.

### Specification

|                    |                    |
|--------------------|--------------------|
| Op frequency Range | 433-500 MHz        |
| Gain               | 2.5 dB over Ground |
| Style              | ½ Wave Dipole      |
| Impedance          | 50 Ohm             |
| VSWR               | < 1.3:1 Over 5 MHz |
| Power Handling     | 50 Watts           |
| Mounting           | BNC Male           |
| Size               | 358 mm Length      |
