

# VHF Hand Held Portable Antennas

## VHF HAND HELD PORTABLE ANTENNAS

Our range of portable antennas are engineered and manufactured with reinforcing at the critical connection between the radiating element and mounting point, to survive the twisting and flexing of every day use.

Our portable antennas are covered with a range of materials such as Polyolefin and PVC to optimize performance, loads and durability.

Our portables are available in a range of connector termination styles, BNC, TNC or PL259. Custom configurations are also available, should we not have a standard product suitable for your needs. In addition, we are able to offer customer pre-tuned antennas to specific frequencies if required.

**MODEL** A – 220  
VHF Low Band 70-85 MHz  
TNC termination connector

**MODEL** A – 222  
VHF Low Band 70-85 MHz  
BNC termination connector

**MODEL** A – 221  
VHF Hi Band 148-175 MHz  
TNC termination connector

**MODEL** A – 223  
VHF Hi Band 148-175 MHz  
BNC termination connector

**HELICAL**  
1/4 Wave  
VHF Hand Held
