

Glass Mount Indoor Antenna **(Model: A-4486-01)**

Features

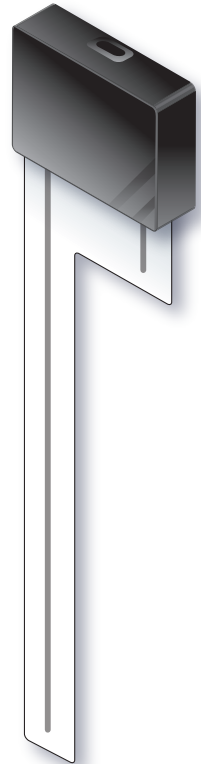

- ❖ Quick installation
- ❖ Favourable reception properties
- ❖ Theft proof
- ❖ No wind noises
- ❖ Long product life
- ❖ Suitable for use with the digital car radio aftersales market

Description

An internal glass mount antenna for adhesive mounting on the middle of the car windscreen or on side panes.

The antenna should be mounted in a location that allows at least 5mm between antenna and vehicle body.

For best performance, avoid locating the antenna in areas which have heating wires or tinted areas of glass.

Specifications

Electrical Specifications

	B III	L-Band
Frequency Range	174-240 MHz	1452-1492 MHz
Gain	9 dB	11 dB
